CONNECT COLOLIGHT WITH AMAZON ALEXA

Preparations

Alexa speakers: Echo, Dot, Tap, Show etc.
Cololight
APP: "Amazon Alexa", "Cololight"

Add devices
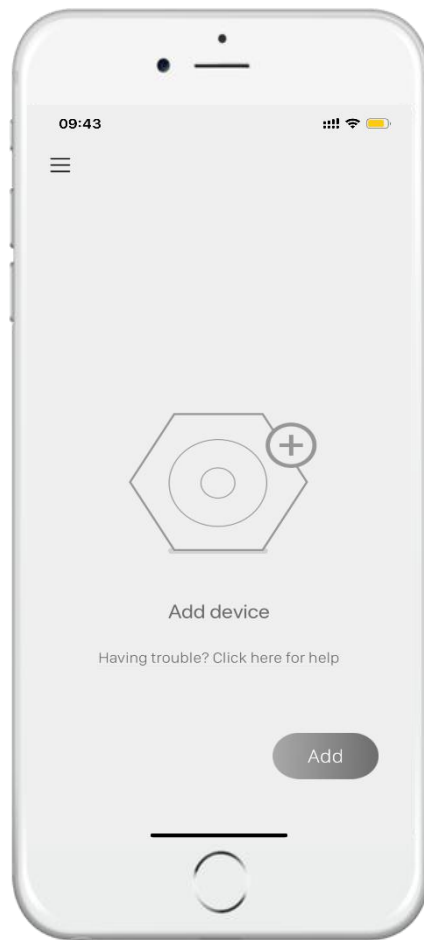

1. Add an Alexa speaker.
   Sign in the Amazon Alexa app, follow the instructions to add the Alexa into the app and set the Internet for it.

NOTE: Country or region of the Amazon account should be one of the five: Canada, Germany, Japan, UK, USA. Otherwise Alexa may fail to learn LifeSmart skills.
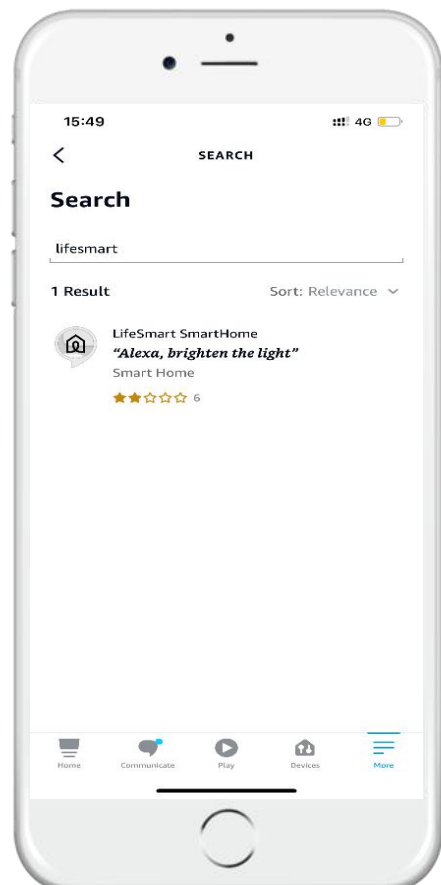

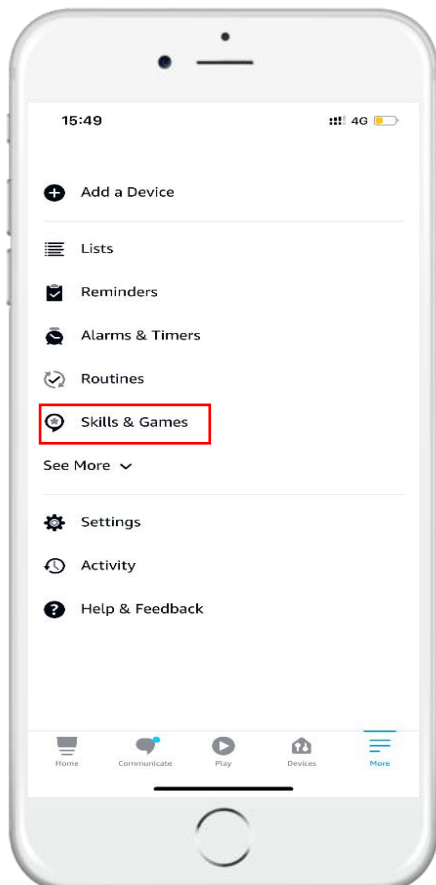

2. Add a Cololight:
   Login LifeSmart account on Cololight app, follow the steps on the app to pair the light.
   .

## Authorize LifeSmart to Alexa

1. Tap 'Skill & Games' in the Alexa app menu and search for 'LifeSmart', then click the skill;

2. Click 'ENABLE TO USE', in the next page input your LifeSmart account and password, tap 'Login' then authorize it.

3. After authorization, close the window by clicking the ' × ' on the top right corner, then click 'DISCOVER DEVICES', it will take around 45s and all devices in the LifeSmart account will sync to Alexa automatically.

Enjoy the smart control with Alexa

You can either check the device status or switch ON/OFF on Amazon Alexa app, or just speak to the Alexa.

e.g. *Alexa, change Cololight brightness to 50%.*
Alexa, change Cololight to red.
